

APP Poly Plast Fiber

Putty with glass fibre

APP No. 010560, 010561

APP Poly Plast Fiber – Polyester-based, two-component putty reinforced with short glass fibers. Perfect for filling large surface irregularities, corrosion-weakened areas, and small holes during car body repair and refinishing.

It offers excellent adhesion to various substrates, including: steel, galvanized steel sheet, aluminum, glass fiber-reinforced polyester products, two-component fillers, polyester laminates, and old OEM coatings.

ADVANTAGES:

+
SHORT GLASS FIBRE (3mm)

+
EASY APPLICATION

+
SHORT DRYING TIME

+
GOOD SANDABILITY
