## APP AcrylFiller Multi Sanding

### Two component acrylic primer filler HS

APP AcrylFiller Multi Sanding is an essential component of any coating system. It is intended for work involving sanding. It can be used in combination with all APP AcrylFiller Multi line hardeners and APP Acryl Verdunnung thinners. It is characterized by very good drying times and easy processing. The addition of thinner allows to adjust the product's spraying viscosity according to requirements arising from the nature of the repair. The APP AcrylFiller Multi Sanding is available in three basic colors: grey, black and white. Appropriate color mixing proportions allow to obtain a large number of shades of gray. The use of appropriate base coloring reduces top coat consumption and improves coverage. Thanks to the use of spectral grays, it is possible to adapt the base to any paint coating color.

#### BENEFITS:

- Possibility of dry sanding after 3 hours in +20°C.
- Time and material savings.
- Possibility of covering with water-soluble and organic (conventional) coats
- Lower base and top coat consumption.

#### ADVANTAGES

+	<b>SHORT DRYING TIME</b>	+	<b>VERY GOOD FLOW</b>	+	<b>HIGH DRY COATING TIGHTNESS</b>
+	<b>UNIVERSAL APPLICATION</b> for repairs with filling and on primed new bodywork panels.	+	<b>LIMITATION OF STOCKS</b> Reduced risk of error. Increased paint shop efficiency.	+	<b>ABILITY TO OBTAIN A SPECTRAL GRAYSCALE PALETTE</b>
