

APP No. 021101

APP R STOP Spray is a penetrating anti-corrosion agent that stops the development of surface corrosion and pitting on steel, galvanized steel, and aluminum.

Applied to a surface cleaned of flash rust, it removes moisture from corrosion centers and isolates them. It ensures long-lasting anti-corrosion protection and priming in a single step.

It can be coated with polyester products as well as one- and two-component primers.

FEATURES:

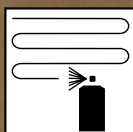

Color: colorless, transparent, matte.

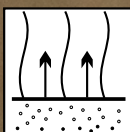

Density: 0,755 g/cm³
(DIN EN ISO 2811-1).

APP R STOP Spray

Anti-Corrosion Agent

APPLICATION:

- Intended for body repair of passenger cars, vans, trucks, and buses.
- Suitable for use on basic automotive metals: steel, galvanized steel, and aluminum.
- For removing moisture and impregnating corrosion pits.
- For sealing and hardening corrosion centers after removal of flash rust.

ADVANTAGES

Good penetration ability.

Simple and ready-to-use product.

Universal in application.

No specialized equipment required.

After drying, ready for further processing and coating.
