APP EP4

Two-component epoxy adhesive

APPLICATION:

- For permanent bonding of metallic and non-metallic materials and composites,
- For permanent bonding of plastics, ceramics, porcelain, glass, jewellery components, wood and building products,
- Excellent for potting parts exposed to variable thermal cycles and vibrations,
- In industrial production, assembly, repairs, e.g. of household appliances, etc.

ADVANTAGES

Fast curing and excellent adhesion at room temperature.

Resistance to acids, bases and many chemicals.

High mechanical strength.

Perfectly bonds: metals and their alloys, plastics, ceramics, porcelain, jewellery components, building components, glass and wood.

Very good insulating properties of electrical connections.

Resistance to shock, vibration and bending.
