

APP BF110 Spray

Anti-corrosion coating for underbody protection

APP No. 050602

APP BF110 Spray is a thixotropic spray coating with anti-corrosion and sound-dampening properties, free from bituminous products.

It is designed for quick repairs and anti-corrosion protection of the vehicle underbody and its components.

It also protects against stone chipping in passenger cars, buses, trucks, and construction machinery. It forms a flexible, thermo-insulating protective layer resistant to weather conditions. It can be overcoated with any type of topcoat paints.

FEATURES:

Packaging: pressurized aerosol - 500 ml

Color: black, matt

Coverage: 1,5-2 m² per can

Temperature resistance: up to 80°C
(for fully dried coating)

APP BF110 Spray

Anti-corrosion coating for underbody protection

APPLICATION:

- For quick repairs and anti-corrosion protection of the underbody and its components, as well as protection against stone chipping.
- As a protective coating against water and salt in wheel arches and on external surfaces of closed profiles of the vehicle underbody.
- As a thermo-insulating and vibration-damping layer.
- For protection of the front panel and underbody against stone impacts.

ADVANTAGES

+	Excellent adhesion to many substrates.	+	Long-lasting flexibility.
+	Water resistance and weather resistance.	+	Easy and universal application.
+	Ready to use after shaking.	+	No need for specialized equipment.
+	Can be overcoated with any type of topcoat paints.	+	Resistant to cleaning agents.
