

APP B200 Autobit Spray

Bitumen preparation for underbody protection

APP No. 050603

APP B200 Autobit Spray is a spray bitumen compound with anticorrosive and soundproofing properties. Intended for quick repairs of anticorrosive protection of chassis of cars, buses, trucks and construction machinery.

Forms a flexible, thermo-insulating weather protection layer.

APP B200 Autobit Spray

Bitumen preparation for underbody protection

APPLICATION:

- For protection of underbody, sills, wheel arches, mudguards against stone chips, sand and salt.
- As a protective coating against water and salt in wheel arches and the outer surfaces of the closed profiles of the car chassis.
- As soundproofing compound for bus and car chassis.
- As a thermal insulation and vibration-reducing layer.

ADVANTAGES

Excellent adhesion to many substrates.

Long-lasting flexibility even at low temperatures.

Waterproof and weatherproof.

The product is simple and versatile in its application.

Once mixed, the product is ready for use.

No specialist instrumentation is required.
