

APP No. 070525 - 070528

Masking film for painting is used for masking undamaged parts of the car body and windows during spraying primers and topcoats. It protects them from overspraying.

Wide (4, 5 or 6 m) film allows one person to cover the entire car very quickly and thoroughly.

### MAIN FEATURES:

Adapts very well to the shape of the car body.

Resistant to moisture and high temperatures.

Electrostatic.

The surface of the masking film is resistant to flaking of sprayed primer, base coat, and topcoat.

### Lacquer films in the APP range:

# APP FE 9 Mask

Paint masking film

4 m

Width suitable for segments A-C.

5 m

Width suitable for segments C-D.

6 m

Width suitable for cars in the D segment upwards.

## Application:

The masking film should only be applied to a dry car body.

If the paint surface is wet or damp, it must be wiped dry.

Leaving the film on a damp surface for too long, especially on a heated paint surface, may cause marks on the car body due to water evaporation.

Proper placement of the film is ensured when the text „APP FE MASK” is clearly visible.

## ADVANTAGES

+	THE FILM MAKES IT EASIER TO MASK THE CAR BEFORE PAINTING	+	REDUCES THE TIME NEEDED TO PROTECT THE CAR BODY	+	REDUCES COSTS	+	REDUCES THE NUMBER OF VARNISHING MATERIAL USED
+	PRECISELY ADHERES TO THE SHAPE OF THE CAR BODY	+	DOES NOT CAUSE TEARING OFF OF THE METALLIC BASE	+	EASY TO REMOVE FROM THE VEHICLE	+	REDUCES THE AMOUNT OF WASTE BY 80%
