Open-cell polishing sponge

The sponge is made of open-cell foam, which, thanks to its specific design, increases the polishing power, while stabilising the temperature during use. The safe height of the sponge (h=25 mm) and the bevelled side profile allow for greater safety when working in hard-to-reach areas. The open-cell design prevents the sponge from becoming too hot, extends its durability and ensures that the polishing paste does not clog it. APP for AD 2Cut is designed for both rotary motion machines and Dual Action polishing machines. Hook-and-loop fastening facilitates changes while working on the paintwork.

APP for AD 2Cut is a very hard polishing pad with highly abrasive properties. Works great on all types of paintwork. It achieves the greatest efficiency and finish when combined with the dedicated APP for AD Cut polishing paste.

ADVANTAGES:

▲ OPEN CELL STRUCTURE

▲ EXTENDED DURABILITY

▲ SEVERELY LIMITED HEATING

▲ BEVELED SIDE PROFILE - FACILITATES ACCESS TO HARD TO REACH PLACES

▲ OPTIMUM HEIGHT - ALLOWS COMFORTABLE DRIVING OF THE MACHINE

APP Nr	Product name	Type	Size	Quantity
080128	APP for AD 2Cut - Open-cell polishing sponge, Velcro, violet	hard	d38/45 h15	6 pcs.
080129	APP for AD 2Cut - Open-cell polishing sponge, Velcro, violet	hard	d50/60 h20	6 pcs.
080130	APP for AD 2Cut - Open-cell polishing sponge, Velcro, violet	hard	d75/90 h25	2 pcs.
080131	APP for AD 2Cut - Open-cell polishing sponge, Velcro, violet	hard	d125/140 h25	2 pcs.
080132	APP for AD 2Cut - Open-cell polishing sponge, Velcro, violet	hard	d150/165 h25	2 pcs.
