

2HEAVY CUT

Polishing felt

2HeavyCut is a modern polish felt made of 50% natural wool and 50% synthetic wool. Using 2HeavyCut will achieve the cutting power of natural wool while reducing matting. The reinforced 2-fibre weave eliminates felt clogging during work and ensures that the felt maintains its structure over an extended time. It can remove the 1500 paper marks without leaving too much of a "mess".

The top felt is made of orange rubber, which minimises vibration during polishing. The hole in the middle results in better cooling and also facilitates an even application of the felt on the plate. APP for AD 2HeavyCut is designed for both rotary motion machines and Dual Action polishing machines. It is attached with hook-and-loop fasteners, so that swapping can be done efficiently and quickly when working on the paintwork.

ADVANTAGES:

- ▲ HYBRID DESIGN
- ▲ HIGH CUTTING FORCE
- ▲ HIGH CUTTING FORCE
- ▲ REINFORCED FIBRE WEAVE
- ▲ CENTRAL HOLE FACILITATES EVEN POSITIONING FUR ON THE PLATE
