Dust-absorbing microfiber cloth

GREEN dust-absorbing microfiber cloth has a special fiber weave that significantly increases the efficiency of removing polish residues and, most importantly, is ideal for polishing glass, ceramics, stainless steel, mirrors, windows and cleaning plastic parts. Thanks to the special fiber structure, the cloth effectively removes streaks, does not scratch, absorbs moisture, dust, fingerprints, etc.

Product specifications

APP No.	080662
Material	20% polyamide 80% polyester
Grammage	360 g/m ²
Washing temperature	60 or 90 °C
Application	automotive, autocosmetics, gastronomy, cleaning companies, furniture, industry

NAVY BLUE dust-absorbing microfiber cloth is highly absorbent, with a harder weave, used for completely removing residues from waxes and polishes that have been left on the part for longer time. It leaves a deep shine without a 'dusting effect'. For a perfect working result, the cloth should always be used dry. Thanks to its special fiber structure, microfibre absorbs dust and mites much more thoroughly than regular cloths making it highly recommended for allergy sufferers.

Product specifications

APP No.	080649
Material	20% polyamide 80% polyester
Grammage	380 g/m ²
Washing temperature	40 or 60 °C
Application	automotive, autocosmetics, gastronomy, cleaning companies, furniture, industry

ORANGE dual-purpose dust-absorbing microfiber cloth with two different lengths of extremely soft microfibers. These microfibers enable quick and precise removal of all types of dirt. Due to its softness, it is particularly suitable for removing polishing paste residues and for finishing waxed surfaces. The cloth absorbs dirt and dust much better than its cotton equivalents.

APP MF Cloth

Dust-absorbing microfiber cloth

USAGE INSTRUCTIONS:

Use the side with the longer microfibers for the final finishing of polished surfaces.

Use the side with the shorter microfibers for initial removal of polishing paste residues.

The high density of the fabric and the softness of the microfibres ensure great efficiency during work and the results are incomparably better than traditional cloths.

ADVANTAGES

+ EXCELLENT MOISTURE ABSORPTION

+ DRIES FASTER THAN ITS COTTON COUNTERPARTS

+ LEAVES NO STREAKS

+ DUST-FREE

+ DOES NOT SCRATCH POLISHED SURFACES

+ ABSORBS DIRT AND DUST BETTER THAN ITS COTTON EQUIVALENTS
