# Soft / Medium Detailing Clay Bars

Mild to medium-strength clay for paintwork decontamination

Soft Detailing Clay is a product designed for new and delicate car paintwork. It effectively removes light surface contaminants, road grime and fine metallic residues, leaving the paintwork perfectly smooth and ready for the next stages of care. Its flexible texture ensures easy shaping and high working comfort, making the clay ideal for regular surface cleaning. It is the perfect choice for those seeking an effective yet gentle solution.

Medium Detailing Clay is a medium-hardness detailing clay designed for the effective cleaning of paintwork with a moderate level of contamination. It effectively removes tougher contaminants, such as road grime, resin, tar and metallic residues, restoring the surface to perfect smoothness. The carefully selected hardness ensures effective performance and comfortable use, whilst safely preparing the paintwork for further care stages, such as polishing or applying protective coatings.

\* The clays are designed for wet use; do not use with APP M TAR Remover

## ADVANTAGES:

- EFFECTIVELY REMOVES DIRT AND GRIME FROM PAINTED SURFACES
- RESTORES A PERFECTLY SMOOTH FINISH AND ENHANCES THE APPEARANCE OF THE PAINTWORK
- PREPARES THE SURFACE FOR POLISHING AND THE APPLICATION OF WAXES AND PROTECTIVE COATINGS
- AVAILABLE IN TWO HARDNESS GRADES TO SUIT THE LEVEL OF SOILING
- THE FLEXIBLE DESIGN ENSURES COMFORTABLE AND EFFICIENT WORKING
- IDEAL FOR REGULAR CARE AND DECONTAMINATION OF PAINTWORK
