Coarse-grained polishing paste

APP for AD Cut is a latest generation polishing paste with an innovative formula that allows removing very deep scratches from the surface of the lacquer. The intelligent abrasive grain, which is ten times smaller than conventional abrasives, ensures a very high level of cut and degree of gloss. The technology used ensures high polishing performance and low dust levels, significantly reducing surface working time. It can be used for all types of factory and secondary paints. It does a great job of matting down after P1500 grade sandpaper. In addition to its very good cutting power, APP for AD Cut also leaves an aesthetically pleasing and smooth finish. The alumina-based formula is free of silicones, fillers and waxes, which is very good for removing spoilage, as well as dust particles generated during work. The exceptionally pleasant banana scent will make even the longest working hours pleasant.

POLISH.

Medium-grained multifunctional polishing paste

APP for AD Polish is a medium-grained polishing paste intended for removing moderate scratches from the lacquer surface. It leaves a high level of gloss in the application. Removes matting from P2000 grade sandpaper. Due to its high performance and low dust content, it significantly reduces the time spent working on the surface. Perfectly prepares lacquer for application of APP for AD Finish paste. APP for AD Polish is an extremely efficient product. It easily and efficiently removes holograms and traces of previous work on the paint, giving the applied surface a very fresh look. The exceptionally pleasant orange scent will make even the longest working hours pleasant.

FINISH.

Fine-grained finishing polishing paste

APP for AD Finish is a new generation polishing emulsion, which ensures perfect finishing of lacquer coats. Thanks to a unique aluminium oxide microbead-based formula, light scratches and moderate signs of wear on the paintwork, as well as holograms caused by previous polishing, can be removed very easily and effectively. The paste gives the coating an incredibly deep shine and creates a mirror-like effect. The exceptionally pleasant apple scent will make even the longest working hours pleasant.
