

NTools RP II 180E

Electric polisher with variable speed control

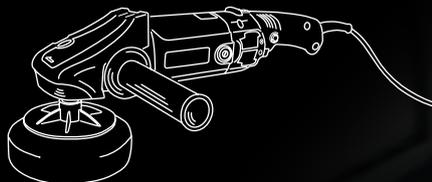

APP No. 126002

NTools RP II 180E is the second generation of this rotary electric polisher with M14 thread for attaching a polishing sponge or work disc. It has a more powerful motor of 1400W and a rev stabilizer that ensures maintaining a constant speed, even at high load.

With the right polish and polishing sponge or buffing pad, it performs perfectly with:

- removing scratches,
- bringing out the depth of color,
- glossing the painted surface.

The rotary motion distributes the abrasive particles of the paste evenly. As a result, the polisher can be used with both highly abrasive and delicate types of polishes.

FEATURES:

Strong, efficient 1400W motor.

Flexible 5 m silicone power cord.

Multifunction electronic control module with speed stabilizer and 6-step variable speed control.

High hardness polishing sponge, ø150 mm, M14 thread.

CE marking ensures that the polisher conforms to European standards.

Structure:

NTools

1 1400W motor

- provides the stability and power required for polishing.

2 Ergonomic, robust, compact body

- made of tough polyamide reinforced with glass fiber (PA6-GF 30)

3 Switch lock

- allows you to keep the machine running continuously without having to hold the trigger.

5 Plastic guard on polishing head

- ensures a stable grip and improves work safety.

4 Flexible silicone power cord

- with a length of 5 m, provides excellent reach and freedom when polishing.

6 Polishing wheel / polishing sponge lock

- makes it easy to unscrew and quickly replace.

7 Side working handle

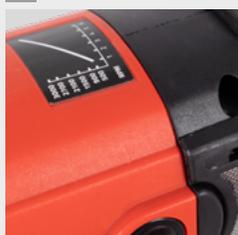

- for more comfortable polishing of horizontal and vertical surfaces.

8 Special fine metal mesh covers on ventilation openings

- provide excellent heat dissipation from the motor and prevent dust and dirt from getting to the commutator and electrical system

Comparison of models and technical data:

The new generation of the NTools RP II 180E polisher is equipped with, among others:

- a more powerful **1400W** motor for adequate power and even speed at the lowest speed under load,
- an **electronic module with an RPM stabilizer and 6 speed regulation** allowing a smooth speed change between 500 and 3000 RPM,
- a longer **5 meter silicone power cord** which is very flexible, kink and crack resistant and provides excellent reach,
- **additional protective covers** improve work safety and prevent dust and debris from entering the body, motor and electrical system

TECHNICAL DATA:

Power	1300 W	1400 W
Rotational speed	600-3000 RPM	500-3000 RPM
Electronic speed control	YES	YES
Soft start	YES	YES
Polishing sponge included	YES (ø150 mm)	YES (ø150 mm)
Disc / sponge mounting	M14	M14
Disc / sponge lock	YES	YES
Protective head cover	NO	YES
Mesh covers on ventilation openings	NO	YES
Side working handle	YES	YES
Working handle D	YES	NO (purchase possible)
Power cord	3 m (red, plastic)	5 m (red, silicone)
Weight	3,25 kg	3,20 kg
Shock protection class	II	II

Electric polisher with variable speed control

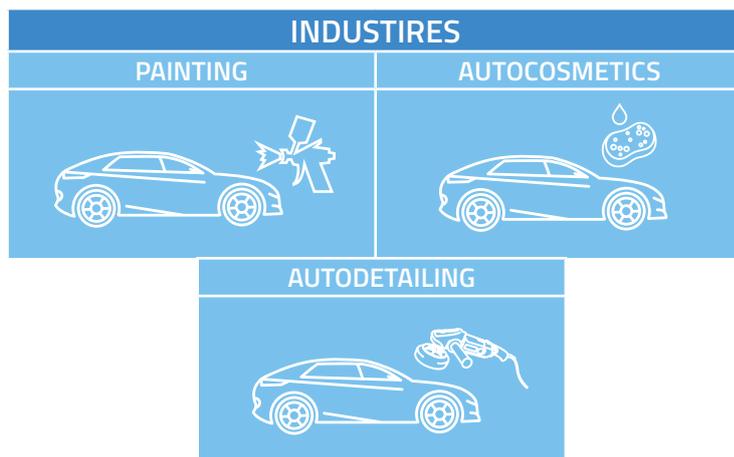

Each polisher has a
**UNIQUE SERIAL
NUMBER**

on the identification
plate

IN THE SET:

- electric polisher with variable speed control,
- white hard polishing sponge, diameter 150 mm, with M14 thread attachment,
- side working handle,
- operating instructions.

ADVANTAGES

+
High power 1400 W
ensures stable, even polishing under load, even at the lowest speed.

+
Long 5 m flexible power cord
for excellent reach and freedom of movement when polishing.

+
Electronic speed control module with
a soft start allows a smooth speed change during work and a constant RPM from 500 to 3000 rpm.

+
Ergonomic, robust, compact housing,
made of durable polyamide reinforced with glass fiber (PA6-GF 30).
