NTools NANO BP3550

Battery powered polisher

APP No. 126030

NTools NANO BP3550 is an extramely handy tool designed for professionals. The NTools NANO BP3550 polisher allows to polish all hard-to-reach places. It is powered by battery, so there is no need to work with electrical cords, which makes the process even easier.

What makes the polisher more unique, is the possibility to work both on dual action and rotation mode (depending on the head fixed). The polisher works perfectly with two discs 35 and 50 mm, which results in versality of use and makes it perfect for tight, hard-to-reach places. The 2 batteries included in the set, with short charging time, allow run-on polishing both in professional and home workshops.
