

NTools Bumper Car Stand

Bumper and spoiler stand

APP No. 170119

NTools Bumper Car Stand is a versatile mobile stand with a stable and robust design. It is made of powder-coated and galvanised steel profiles.

It is used for the storage of body components, such as bumpers and spoilers, protecting them from accidental damage. It is equipped with 8 arms, the height and spacing of which can be very easily adjusted as desired. In addition, each arm is secured with a soft polyethylene foam strip to protect the stored items from scratches or damage.

Wide and sturdy wheels ensure that the stands can be moved around the bodyshop easily and comfortably. The stands are used in both bodyshops and workshops.

FEATURES:

PE foam protective lining

Easy and quick installation

Wide range of applications

Stable and robust design

NTools Bumper Car Stand

Bumper and spoiler stand

NTools

Construction:

1
Lining - foam
The arms are protected by a soft PE foam lining, which dampens impacts and protects the component from damage.

2
Robust design
The individual stand components are powder-coated and galvanised.

3
Wide 180 mm diameter wheels
50 mm wide wheels with tread for convenient manoeuvring when moving the stand.

4
Adjustable arm spacing
Arms width can be adapted to the workpiece to be placed

5
Stable position
The stand is equipped with a wide and robust profile that maintains adequate stability even for large items.

TECHNICAL SPECIFICATIONS:

Material of manufacture	galvanised steel
Tube profile	tube diameter 20 x 1.5 mm
Dimensions	height 218 cm x width 113 cm x length 118 cm
Lining	grey polyethylene foam
Arm width	118 cm
Load capacity	80 kg
Unladen weight	28 kg

ADVANTAGES

+ VERSATILE USE	+ SOFT PROTECTIVE LINING	+ ADJUSTABLE ARM SPACING
+ STABLE AND ROBUST DESIGN		+ WIDE WHEELS
