

NTools Premium BUS

Revolving stand for elements

APP No. 170122

NTools Premium BUS is an extended and reinforced version of the NTools Premium stand.

A more versatile and easier to use rotary paint stand with a rigid and stable construction made of powder-coated steel profiles and tubes and galvanised steel profiles.

Extended stand (2220 mm) for sanding, polishing and varnishing large car components or 2 standard car components (e.g. right and left door). It allows any car body component to be securely and stably clamped by means of adjustable hooks adapted to the technological openings of car body sheets of all vehicle models.

The rack-and-pinion mechanism with toothed foot locking device allows easy rotation and locking of the repaired component at any angle. Wheels with a width of 52 mm and a diameter of 195 mm allow the stand and the component to manoeuvre freely around the workshop.

FEATURES:

2 mm Thick profile walls - 2mm

100 kg High stand load capacity - 100 kg

 Stable and robust construction

Accessory for upgrading the Premium rack to Premium BUS:
