

DEIRONIZER

Fallout Remover | gel

Ready-to-use gel-based cleaner. Perfectly removes inorganic grime, especially brake pad dust, traces of volatile rust and other road grime on all vehicle exterior surfaces. Suitable for cleaning alloy as well as chrome and lacquered rims. Highly effective and user-safe due to neutral pH. Features reaction indicators that cause a „bleeding” effect when reacting with metals, progressively changing the product’s colour to purple. The product’s increased density ensures it does not run off the components too quickly, delaying evaporation and prolonging action time on the cleaned surface. Deironizes the cleaned surface without the risk of scratching.

ADVANTAGES:

- COMES READY TO USE WITH A SPRAYER
- GEL-LIKE TEXTURE
- SUITABLE FOR CHROME AND PLASTIC SURFACES
- IDEAL CHOICE FOR BODYWORK CHEMICAL DECONTAMINATION
- NEUTRAL pH
- BLEEDING EFFECT
