APP Clay Mitt

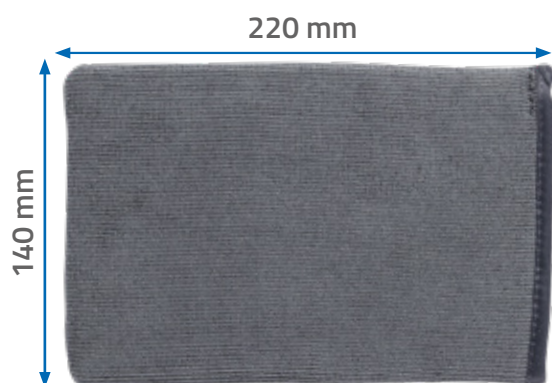

Glove for decontamination of car body

APP Clay Mitt is a product dedicated to mechanical removal of impurities such as lacquer dust (facilitates further polishing), industrial deposits, volatile rust, tar, asphalt, tree resins, or insect residues.

APP Clay Mitt enables cleaning of painted and glass surfaces (car body, windows, headlights). The glove does not damage the surface and is very easy to use. Designed for use on all types of topcoats.

The polymer surface of the glove removes dirt reliably and quickly. It works perfectly on flat surfaces as well as on all curves, convexities and concave areas of vehicle bodies.

TECHNICAL DATA:

- **material:** microfiber, polymer rubber
- **yield:** up to 50 vehicles

ADVANTAGES
