LEATHER CONDITIONER SATIN / MATT

Leather preservative | satin / matt | Airless

High-quality lanolin based product for the preservation, impregnation and deep care of smooth leathers. The product is available in two versions - satin or matt finish. It increases the resistance of the leather surface to scratches and hinders the absorption of soiling on the protected surface. Thanks to the deeply active natural substances, the leather becomes softer, more flexible and resistant to damage, slowing down the aging process of the material. The product refreshes colours, leaving a satin or matt finish on the surface. The use of „airless“ packaging ensures that all the contents of the pack can be used.

ADVANTAGES:

- NATURAL LANOLIN-BASED PRODUCT
- INCREASES SCRATCH RESISTANCE OF THE LEATHER SURFACE
- TWO FINISHES - MATT AND SATIN
- REFRESHES THE COLOUR OF THE PROTECTED SURFACE
