LEATHER HARDENER

Leather varnish hardener

Hardener for use with APP for AD Leather Color basecoats and APP for AD Leather Top Coat topcoats. The product increases the resistance to abrasion and scratching of leather varnishes while changing the varnish flexibility. As an additive, it increases the surface resistance to cleaning chemicals and reduces susceptibility to abrasion. It impedes the adhesion of soil particles making it easier to wash and clean the surface. Creates a crack-resistant coating due to the high flexibility of the film formed.

ADVANTAGES:

- ONE HARDENER FOR SEVERAL PRODUCTS
- MAKES IT DIFFICULT FOR DIRT PARTICLES TO ADHERE TO THE SURFACE
- INCREASES RESISTANCE TO ABRASION OF LACQUERS FROM APP FOR AD LEATHER SYSTEM
- CREATES A CRACK RESISTANT COAT

APP No.	Product name	Volume	Amount
