

LEATHER FILLER LIGHT

Liquid filler for leather

A water-based liquid filler used as a filler for small face cracks, nicks, grooves, scratches and shallow defects in natural leather used in automotive upholstery and related areas. After filling the defects, it remains flexible without changing the properties of the leather. The filler may be pre-coloured with APP for AD Leather Color basecoats. The product shows high adhesion to the repaired surface, forming a perfectly bound layer with it. The filler is resistant to typical chemical cleaning and leather care products.

ADVANTAGES:

- WATER-BASED PREPARATION
- PERFECTLY FILLS SMALL CRACKS
- QUICK-DRYING PRODUCT
- HIGH FLEXIBILITY
