

FABRIC COAT

Fabric and convertible top impregnator

APP for AD Fabric Coat is a safe and highly effective impregnating preparation for textile materials and convertible tops. Very easy application combined with excellent final result. The nano-particles contained in the preparation penetrate deeply into the structure of the fabric, thanks to which it becomes water-repellent, but at the same time does not limit its breathability. Makes it easier to keep fabrics clean both inside and outside the car. Slows down the ageing process of the protected material and does not cause it to stiffen. We recommend preserving the roof at least twice a year - before and after the use period. Under standard use conditions, the effect will last for a whole season and one pack will protect the entire roof. Product performance depends on the density of the material to be protected.

ADVANTAGES:

- STRONG HYDROPHOBIC PROPERTIES
- PROTECTION AGAINST UV RADIATION
- VERY EASY TO USE
- REDUCES THE POSSIBILITY OF CONTAMINATION

APP No.	Product name	Volume	Amount
223030	APP for AD Fabric Coat - Fabric and convertible top impregnator	500 ml	1 pc.
