NTools X CUT Cutter

NTools X CUT - X CUT knife is a recommended tool for all types of production, storage, workshop or assembly work. The cutter makes it possible to cut materials of different thicknesses and resilience, including soundproofing mats, leather, rubber, paper or thin plastic, among others.

The NTools X CUT is made of ABS plastic and the body is additionally corrugated, which provides a secure grip and protects against accidental damage. The blade guide is made of metal.

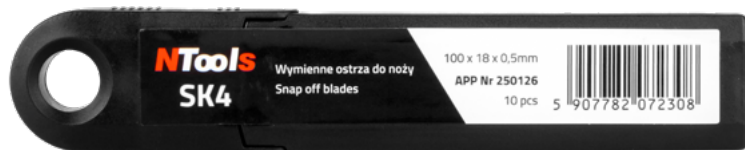

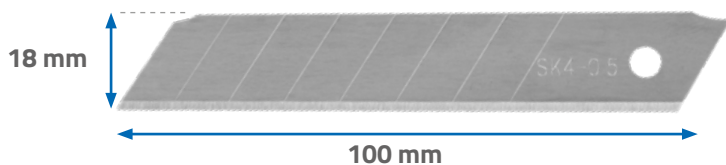

NTools SK4 - high quality replacement breakaway blades for NTools knives. Made of tool steel, they are characterised by a long service life and increased hardness. The extraordinary sharpness is ensured by the laser-sharpened cutting edge in three planes - this guarantees precision and ease of cutting. The blades are designed for use when cutting materials of various thicknesses and resilience, including soundproofing mats, leather, rubber, paper, foil, cardboard or thin plastic.

Thickness of blade:
0,5 mm

Material:
SK4 tool steel

Packaging:
plastic for 10 blades
