

**APP No. 350394**

**NTools MBSN** - straight eyelet (bit) magazine for the NTools SPOT 3000.230 spotter is an indispensable tool for anyone who appreciates speed and comfort.

It has been designed to make the process of repairing car body dents easier and faster.

**OPERATING PRINCIPLE:**

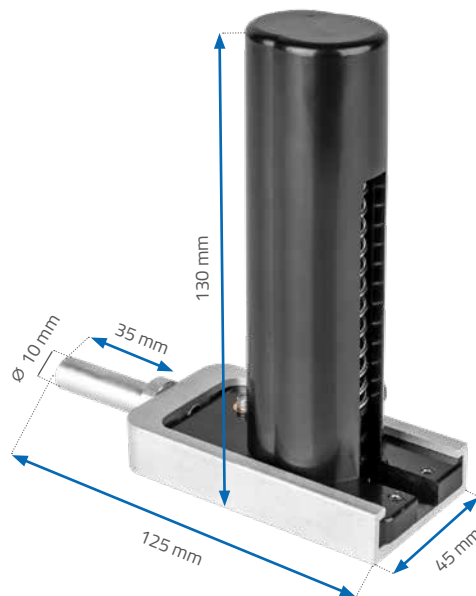

- the magazine containing the eyelets is fitted in the spotter gun,
- Apply it to the surface to be repaired and press the trigger of the gun (the eyelet is pressed against the to the workpiece),
- move the gun with the magazine away from the bodywork (the mesh has been pressed onto the body),
- pull back the side grip of the magazine in order to reload the next round and continue work.
