## NTools Puller Set

### Dent removal kit

NTools Puller Set is a professional set designed for paintless removal of dents using the adhesive method. The most common reasons for the formation of dents on the car body are:

- hailfall,
- falling objects on the car body (e.g.: chestnut, walnut, etc.),
- door dings.

The kit contains the necessary instruments for work during paintless dent removal. The mobility of the set is ensured by a system case having a foam insert organizing and protecting all elements of the set.

#### SET CONSISTS OF:

- Puller for adhesive repairs NTools PNK (APP No. 351551)
- Hot melt glue stick gun with temperature control NTools GG 150W (APP No. 351868)
