## Hydraulic spreader 4T / 10T

APP No. 360721, 360722

**Hydraulic spreader 4T / 10T** - The hydraulic spreader with accessories has been designed for pulling and spreading the bodies of post-accident cars and for workshop work. It is mainly designed for spreading, stretching, pulling, lifting, bending, straightening.

The hand pump can be used in both horizontal and vertical positions. In the vertical position, the end of the hydraulic hose must always point downwards.

The unit has been filled with hydraulic oil at the factory, but the oil level must be checked before use.

### Technical data:

Model	RH4T	RH10T
Index	360721	360722
Spreader force	4 Tons	10 Tons
Operating pressure	616 bar	636 bar
Piston stroke	120 mm	150 mm
Suitcase	Yes	Yes

### The user manual contains important information, such as:

- procedure for assembling the pump with actuator and end fittings,
- venting procedure before use,
- checking and topping up of hydraulic oil,
- examples of applications.
