NTools FLEXPAD

One-sided sanding sponge

NTools FLEXPAD are one-sided, thin and flexible abrasive sponges in sheets (140 x 115 mm size) for the manual processing of putties, primers, topcoats, plastics, metal, wood and wood derivatives. They are made of foam bonded by a highly flexible synthetic resin with aluminium oxide abrasive grain.

APPLICATION:

FINE

sanding before undercoating

ULTRAFINE

surface preparation for particularly challenging paints

SUPERFINE

sanding the undercoat of paint

MICROFINE

surface preparation for particularly challenging paints, shading

ADVANTAGES:

+ They do not break when folded

+ The grain does not splinter

+ Dry and wet working

+ By providing uniform pressure, they ensure excellent quality of the sanded surface

+ They reach places inaccessible to sandpaper

+ They adapt to the shape and profile of irregular surfaces providing a uniform finish
