**Product name: White Grease Aerosol APP BS80.  
APP No.: 212008.**

Universal lubricant including PTFE of neutral pH value. It is designed for use where heavy loads follow and temperature from -30°C up to +180°C.

Package: 400ml Aerosol.

Product and additives: APP BS80.

Colour: white.

Use:

- Lubricating of slide, rolling bearings under heavy load and spindles, mandrels, guides of machines used in shipyard industry and vehicles, as well as during operation of machineries for farming and construction industry
- Long-term lubricating (to lengthen lubricating intervals)
- Lubricating battery poles (also in terms of insulation and maintenance)
- Protection of rotating elements against jamming
- Elimination of noise, squeal and creaking of slide elements e.g. slide guides
- Protection of rotating metal parts against freezing.

Properties:

- Facilitates movement of elements on slide guides as e.g. car seats, lockers, drawers, folder roofs
- Prevent wear and tear of bearings, rollers, chains, gear wheels, hinges, brakes and locks
- Eliminates bothersome noise, squeal and creaking that follow during friction resulted from cooperation of parts and elements
- Prevents defects and repairs and reduces maintenance and lubricating costs
- Keeps water away
- Protects against corrosion and oxidation
- Resistant to small concentrations of acids, salts, bases
- Resistant to pressure.

## Application

Process:

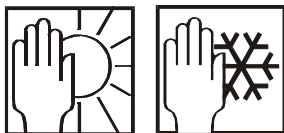

Remove remains of other lubricants and mechanical contamination with APP BR01 brake remover.

Mix well by shaking the container for 2-3 minutes.

Apply this coat of APP BS80 maintaining distance 10 -20 cm.

Repeat, if necessary.

## Storage:

Store in closed, original containers in dry and well ventilated spaces.

Protect against freezing and temperature over 50°C.

## Industrial Safety:

Product for professional use only.

See: labels on containers and MSDS.

User must follow locally and regionally applicable industrial safety regulations.
