Product name: Compressed Air and Freeze Spray APP SP 69 Spray. APP No.: 212069.

Pressurized packaging that contains compressed air and propellant gas. When blowing out at high pressure it ensures cleaning and removal of dust and other contamination at hard to reach areas also. It enables freezing during assembly or disassembly.

Package: 600 ml Aerosol.
Product and additives: APP SP 69 Spray.
Basic components: propellant gas and air.
Colour: colourless.
pH: 7,0.

Application:

- Purposed for use in electronic, optical equipment glass, precision engineering, and engineering electromechanical equipment
- Cleaning and removal of dust and other contamination at hard to reach areas
- Position the container upside down (valve downwards) to reduce temperature down to -69°C of elements during assembly or disassembly.

Use

Process: Position the valve and nozzle towards the surface to be cleaned and press the valve to activate aerosol.

In case of assembly or disassembly of pressed elements when volume reduction is required, position the container upside down with valve downwards and activate aerosol directing the jet at the element to be frozen.

Caution.

Do not shake the container before use. Do not pierce, or burn also after use. Do not spray on an open flame or other ignition source. Protect against ignition sources. Do not smoke during spraying.

**Product name: Compressed Air and Freeze Spray
APP SP 69 Spray. APP No.: 212069.**

Storage:

Store in closed, original containers, in dry and well ventilated spaces.

Protect against freezing and temperature over 50°C.

Occupational Safety:

Product for professional use only.

See: labels on containers and MSDS.

User shall follow locally and regionally applicable industrial safety regulations.
