**Product name: Shampoo for hand washing with quartz,
APP for AD SiO₂ Shampoo.
APP No.: 220035**

A nanotechnology-based shampoo for manual car washing, combining effective deep-cleaning properties with outstanding care properties. Allows an exceptional shine to the cleaned surface.

Packaging: 220035 – 500 ml

Basic ingredients: Mixture of chemical components.

Colour: Yellow, clear

Application: Preparation designed to remove dirt from vehicle surfaces while caring for, maintaining and polishing the cleaned surface.

Properties: An effective deep-cleaning and at the same time conditioning agent for a high-gloss finish.

Advantages: Effectively removes contaminants from normal vehicle operation. An innovative combination of surfactants allows to support the shedding of dirt and water already in the washing phase. Facilitated water flushing and drainage. Accelerates the drying of surfaces while facilitating wiping. Leaves a subtle film to increase shine and gloss.

Application

Mixing ratios. Concentrate. Add 25–50 ml of product per 10 litres of water (dilute 1:200 to 1:400), (percentage concentration: 0.25 to 0.50%).

Method of use. Rinse off larger contaminants with plenty of water beforehand. Apply the shampoo solution to the surface of the part with a soft sponge or washing glove. Rinse the sponge or glove frequently in water. Apply the shampoo solution generously and as often as possible to each component. Recommended washing technique – “with two buckets”. Do not allow the dirt emulsion that forms to dry out. Rinse abundantly with water under pressure. Do not apply to heated surfaces. Do not use at temperatures below 4°C.

The above information is in line with the current state of knowledge of our products and their possible applications. This does not guarantee specific properties or suitability for use under specific conditions. Follow the notes and warnings on the product labels and on the safety data sheet. We assume no liability if the final result of the work was influenced by factors beyond our control.
