Product name: PLAST Care

Maintenance and care agent for plastic elements.

<u>Container:</u>	5.0 l
<u>Basic components:</u>	Hydrated oil- and polymer-based emulsion
<u>pH:</u>	7.4
<u>Colour:</u>	White
<u>Density:</u>	1.02 g/cm ³
<u>Smell:</u>	Characteristic
<u>Usage:</u>	Car interior elements made of plastics, dashboard body, cockpit, door lining, and imitation leather.

<u>Directions for use:</u>	Apply the preparation onto previously cleaned surfaces using a soft cloth and lightly rub it in. Do not spray the product directly onto the surface. The applied agent dries very quickly and forms layer, which repels water and prevents soiling. Depending on the thickness of the applied layer, the product leaves a mat surface (thin layer), or makes it slightly glossy (thicker layer).
----------------------------	--

<u>Constraints:</u>	Do not apply the liquid onto highly heated up surfaces. Do not spread it onto the steering wheel, gear stick, or pedal pads.
---------------------	--

<u>Equipment cleaning:</u>	Water.
----------------------------	--------

The above information complies with the current knowledge on our products and their possible applications. This guarantees no specific properties or usability in particular conditions. Users should observe guidelines and warnings provided on product labels and specified in material safety data sheets. We hold no responsibility if conditions beyond our control affect the final result of work.
