**Product name: Leather lacquer solvent,  
APP for AD Solvent — solvent for leathers.  
APP No.: 220968.**

The formulation is an organic solvent for leather lacquers used only before the intended leather re-dying. Removes old, improperly adhered coatings. Washes off old impregnates and lacquers from surfaces. Can be diluted with water. Helps dissolve dye in water while increasing adhesion. Can be used as a thinner for organic systems.

Packaging: 200 ml

Product and accessories: APP for AD Solvent can be used as a thinner for APP for AD Leather Color.

Key ingredients: Organic solvent.

Colour: Transparent

Application: For removing old lacquer before re-lacquering. For removing impregnates and protective coatings from surfaces to be re-lacquered. Add up to 5% to new lacquer to increase adhesion to problematic surfaces.

Properties: Improves the adhesion of lacquers to leather.

Benefits: Removes old lacquer from leather surfaces. Removes impregnations and protective layers from leather surfaces to be lacquered. Increases the adhesion of lacquers to leather surfaces. Allows colouring of leathers with a difficult adhesion surface (stubborn, greasy and strongly water-repellent). Can be used as an additive (up to 5%) to APP for AD Leather Color to increase adhesion.

## Usage

Mixing ratio: Ready-to-use agent for dissolving old lacquers, impregnates and protections. As an additive: up to 5% as a thinner for new lacquer.

Surface preparation: The surface must be cleaned and degreased before removing old lacquer, impregnations, protective agents.

The above information is in line with the current state of knowledge of our products and their possible applications. This does not guarantee specific properties or suitability for use under specific conditions. Observe the notes and warnings on the product labels and in the safety data sheet. We do not accept any responsibility if the final result of the work is influenced by factors beyond our control.

**Use method:** Do not spray directly onto a surface to be cleaned. Soak a microfibre cloth in the preparation. Spread evenly in a circular motion on a surface to be cleaned. Immediately remove the forming emulsion with a second, clean and dry microfibre cloth. Continue lapping until the surface is as smooth as possible. If necessary, repeat the operation. Work one element at a time; it is not recommended to apply the product to two or more elements at the same time.

**Equipment cleaning:** Running lukewarm water.

## Storage

Store in closed original packaging in a dry and well-ventilated room and at a temperature of +5°C to +30°C. Protect from direct sunlight.

## Health and safety regulations

See text on product labels or in the material safety data sheet. Users must comply with health and safety regulations in force in respective countries.
