

• **APP Supra**
Universal Putty

APP Supra is an all-purpose two-component Polyester filler of medium specific weight 1.30 kg/dm³. Its creamy consistency makes use very easy on surfaces of complex shapes. Thanks to low shrinkage during hardening it may be applied on big surface.

Formula containing advanced fillers ensures smooth surface without irregularities and pores.

ADVANTAGES:

- Short drying time;
- High quality finish (without pores);
- Perfect transition between filler and substrate;
- Reduced shrinkage during hardening;
- Reduced moisture penetration;
- Very good adhesion to demanding substrates e.g. galvanized sheet steel;
- Easy treatment both manual and by machinery.

PERFECT ADHESION

SHORT DRYING TIME

WITHOUT PORES
