• **APP QUARTZ Q102**
Universal putty

APP QUARTZ Q102 is a high-quality polyester putty with a wide range of application which combines the features of filling and finishing putties. It is intended to fill in both small and large cavities. Thanks to the use of a micro-filler in combination with modern formula, the putty provides a smooth non-porous surface after sanding and high durability of repairs.

APP QUARTZ Q102 putty is characterised by creamy texture, it is very easy to apply and process, both manually and with machines, using coarse and fine sand papers. The putty may be applied on both primed and unprimed surfaces without the risk

ADVANTAGES:

- creamy texture,
- easy to apply and process,
- the micro-filler used allows to obtain high quality of ground surface,
- very good adhesion to difficult-to-bond substrates, such as galvanised sheet steel.

★ QUICK DRYING

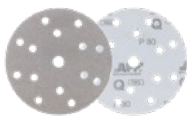

★ MULTIFUNCTIONAL

★ SMOOTH SURFACE

★ NO HOLES
