• APP Grund EP Spray Epoxy ground

The Grund EP Spray is a fast drying epoxy foundation intended for anti-corrosion protection. Thanks to the use of high quality epoxy resins it features very high adhesion to iron, steel, galvanized steel and aluminum. It may be coated with all types of surface lacquers.

Application: Grund EP Spray is intended for grounding fine sanding areas and for micro-repair systems. Thanks to a very good flow properties, the epoxy ground may be used in a "wet on wet" work system, as well as using the classic method with sanding.

Advantages:

- wide stream nozzle, whose construction allows to achieve a stream similar classic paint gun stream
- fast drying, can be sanded just 30 minutes after application
- very good insulating properties.
- anti-corrosion additives
- thermal resistance up to 90°C
- efficiency: 1,25 m²
