

• APP Modular 2K Acryl Line 50-96 Dulling Additive

Special purpose product intended for dulling of APP Modular 2K Acryl Line top coat. Application of matting additive does not result in discoloration, change of levelling and UV resistance.

Caution! Mixing ratio of hardener and thinner for the desired effect shall be according to ratio of top coat.

Use. Mixing ratio by volume before adding the hardener and thinner to the top coat:

- **Semi-matt:** 30% by volume of dulling paste
70% by volume of APP Modular Acryl Line
- **Matt:** 100% by volume of dulling paste
100% by volume of APP Modular Acryl Line.

Drying time of coat along with dulling additive may be longer than specified in the top coat's manufacturer instructions.

Advantages of improved 50-96 dulling additive:

- Proper consistency of dulling additive that enables mixing with the stirrer.
- Uniformed dull effect of the whole coated surface regardless of sprayed coat thickness.
