

• APP Modular Special Base Thinner 80-130 / 80-140 Normal / free base thinner

APP Modular Special Base Thinner is designed for adjustment of spraying viscosity of base lacquers. The advanced recipe of organic thinners makes the basic thinner fully compatible with base lacquer APP Modular Special Base and with all base lacquers of similar type, available on the market.

APP Modular Special Base Thinner is dedicated mostly for the base lacquers, in particular for colour recipes containing pigment of aluminium type.

ADVANTAGES:

- 1) The possibility of selection between two thinner types, **NORMAL** and **SLOW**, allows for optimization of evaporation time in various work conditions.
 - APP Modular Special Base Thinner 80-130 **NORMAL** is used according to thinned product recipe for temperatures **from 15°C to 25°C**.
 - APP Modular Special Base Thinner 80-140 **SLOW** is recommended for temperatures **from 25°C to 35°C** in order to slow down the mixture evaporation.
- 2) The possibility of mixing normal and slow thinners allows for obtaining the optimum evaporation time, suitable for existing work conditions.
- 3) The base thinner assures better grain location in the lacquer structure.
- 4) The base thinner improves stability of prepared mixture of the base lacquer.

APP no.	Product name	Type	Package type	Unit pkg.	Coll. packg.
0260131	APP Modular Special Base Thinner 80-130	Base thinner	normal	1 L	1 pc. / 6 pcs.
0260141	APP Modular Special Base Thinner 80-140	Base thinner	slow	1 L	1 pc. / 6 pcs.
0260135	APP Modular Special Base Thinner 80-130	Base thinner	normal	5 L	1 pc. / 4 pcs.
0260145	APP Modular Special Base Thinner 80-140	Base thinner	slow	5 L	1 pc. / 4 pcs.
