

• Thinner for acrylic products and metallic bases

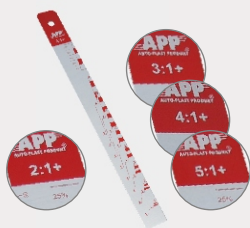

APP 2K-Acryl Verdünnung AVW - slow APP No. 030101/030131/030141

Thinner for acrylic products and metallic bases, designed for application during the renovation lacquering of cars and vans. Possibility of choosing between two thinner types: AVS – quick and AVN – normal, AVW - slow and adjustment of spray viscosity of prepared products allows to optimize the evaporation time in various operational conditions.

It is recommended to use Acryl Verdünnung thinner in **SLOW version** when temperature exceeds 25°C in order to **slow down evaporation of the mixture and to obtain a smooth surface.**

- Strip with scale for mixing 2K products
