

## ● Silicone remover

### APP W911 Silikonentferner

Preparation for cleaning and degreasing. Provides optimal adhesion of applied products and prevents silicone craters creation while painting. Środek czyszcząco odtłuszczający. Designed for removing impurities such as: silicone, teflon, oils and greases from surfaces designed for topcoating. It may be used on non-isolated metal surfaces, old topcoats, primers, fillers and filling coats before topcoats application.

**APP W911 is a new generation remover. Thanks to a modified formulation and extended evaporation time new APP W911 remover enables more precise degreasing of large surfaces at any phase of top coating works.**
