

• **APP Primer KM**
Primer for windshield glue

The APP Primer KM is a primer intended for use as a base for polyurethane car windshield installation glue. It is essential to increasing adhesiveness and protecting the glue against the harmful effects of UV radiation.

APPLICATIONS:

- as a primer for windshield glues, applied onto the glass, ceramic and lacquered surfaces,
- for use as an insulator on windshields and lacquered coating damaged during cutting,
- for use in the automotive industry and at service stations during replacement of damaged windshields.

ADVANTAGES:

- protection against corrosion,
- quick evaporation 10-15 min,
- possibility to apply glue within one hour from drying,
- possibility to optimize work time,
- simple and efficient application using the APP applicator.
