

• APP ButylTape Sealing Tape

APP ButylTape is a synthetic self-adhesive sealing butyl tape. Thanks to high elasticity it adheres very well to substrate and is widely used in:

1) Automotive industry:

- To provide car body sound insulation;
- When sealing and securing gaps between body elements;
- Applied as caravan and car body humidity barrier.

2) Construction industry:

- For sealing purposes during assembly of roof or wall coverage and skylights or rain gutters;
- For sealing of lapped bonding to prevent water, dust or humidity penetration.

3) HVAC (Heating Ventillation Air Conditioning):

- When sealing connections of HVAC ducts.

BENEFITS:

- High elasticity during service life;
- Good UV resistance;
- Good adhesion to different substrates;
- Comfort of use and possible dismantling of sealed components;
- High precision and minimizing of waste;
- Resistance to temperature from -40°C to +90°C.

APP No.	040711	040712
Colour	gray	black
Type	flat	roller
Size	20 mm x 2 mm x 22,5 m (width x thickn. x length)	8 mm x 6 m (dia. x length)
Bulk package	1 item	3 items
