## • APP QUARTZ Q809 / Q810 / Q809&Q810 Microfiber Buffing Pad / Microfiber Buffing Pads Set

APP Quartz Q809 and Q810 Microfiber Buffing Pads offer modern a solution for painting and detailing purposes. Pads are dedicated for operation with Dual Action polishers (eccentric operation). Made from high quality Polyurethane foam and fine microfibers. Specially designed foam of two different hardnesses offers ideal cushioning between the polisher and the coat.

APP Quartz Q809 is purposed for initial buffing whereas APP Quartz Q810 is purposed for works related to finishing. Pads are provided with the centre hole and specially designed holes located within whole surface. This solution ensures maintenance of proper temperature during buffing and prevents overheating of pad and coat.

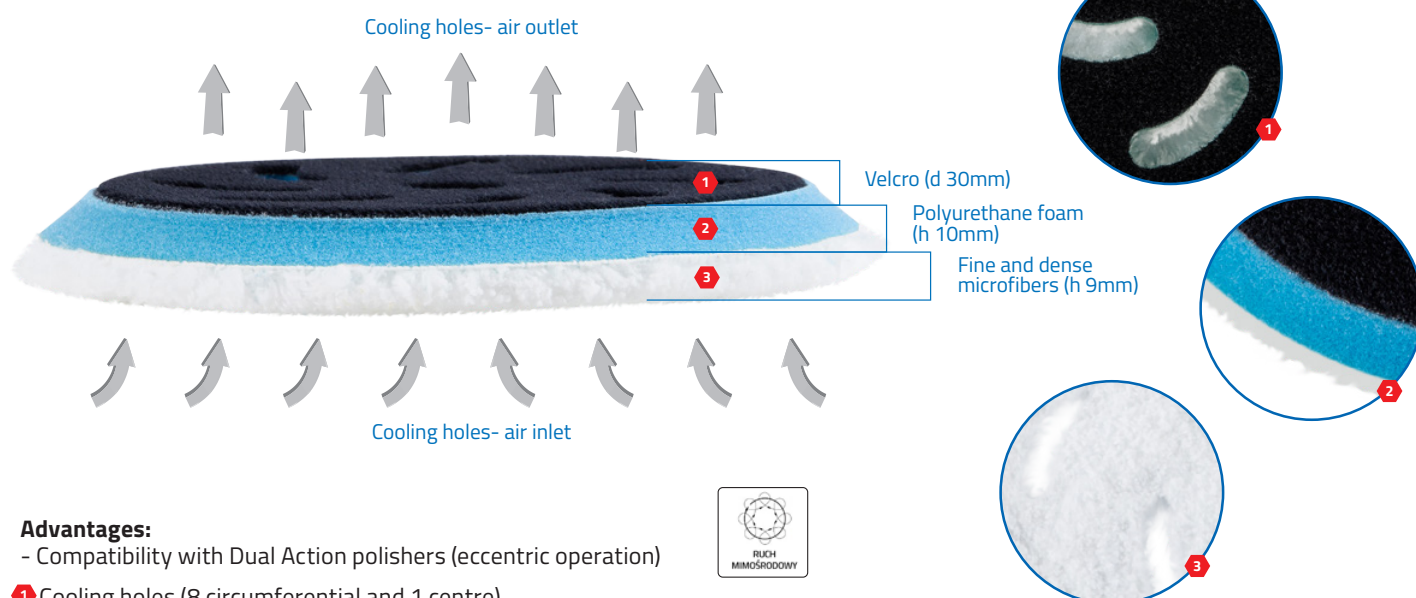

Comparing to traditional buffing pads the applied microfibers improve work efficiency when buffing any dulling and deep scratches. It is perfect solution for old coat repair and removal of holograms.

APP Quartz Q809 and APP Quartz Q810 is dedicated for APP Q801 and APP Q802 Polish from Quartz series.

## • APP QUARTZ Q809 / Q810 / Q809&Q810 Microfiber Buffing Pad / Microfiber Buffing Pads Set

### Buffing pad construction:

### Advantages:

- Compatibility with Dual Action polishers (eccentric operation)

1 Cooling holes (8 circumferential and 1 centre)

- Maintenance of proper temperature during polishing – improved cooling

2 Polyurethane cushioning foam (two different hardnesses – perfect adhesion to treated surface)

3 Working surface consisting of fine and dense microfiber – high efficiency

- Very efficient removal of scratches.
