Microfiber Dust Absorption Cloth

Dust absorption **GREEN** cloth features specific woven microfibers that ensure improved removal of polish remains and make it perfect for polishing of glass, ceramics, noble steel, mirrors, glass and cleaning of plastic components.

Special designed fibers ensure efficient removal of streaks, prevents stretches, absorbs humidity, dust and cleans fingerprints.

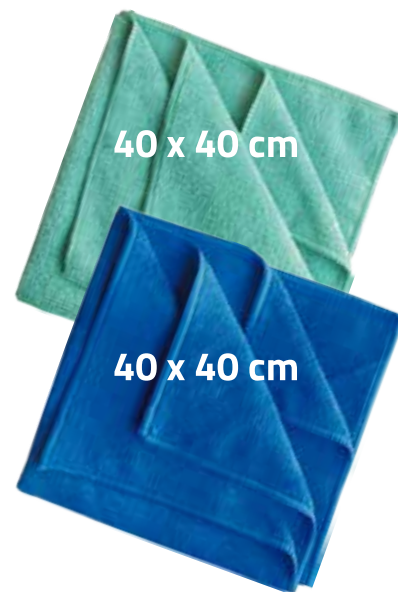

**USE:** Automotive sector, auto care products, catering, cleaning companies, furniture sector, mineral industry (ceramic, glass), manufacturers of musical instruments, toys, bathroom tapware etc.

Automotive sector, auto care products, catering, cleaning companies, furniture sector, mineral industry (ceramic, glass), manufacturers of musical instruments, toys, bathroom tapware etc.

Dust absorption **NAVY** cloth features with high absorption and harder woven fibers and is purposed to remove wax and polish remains left for some time on cleaned surface.

It imparts high gloss without dusting. To ensure perfect effects always use a dry cloth. Specially designed structure of microfiber absorbs more dust and mite better than standard cloths and is recommended to allergic persons.

**USE:** Automotive sector, auto care products, furniture sector, industry.

- MICROFIBER ADVANTAGES:**
- Absorbs up to 700% more humidity in relation to its weight
  - Dries 30% faster than cotton cloth
  - Does not leave streaks
  - Prevents dusting
  - Does not scratch a polished surface
  - Absorbs 50% more of dust and dirt
