Flat Filter Adapter (Set 2 items)

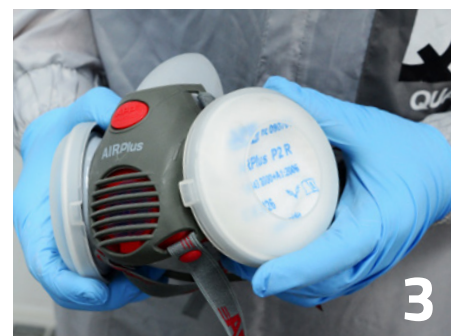

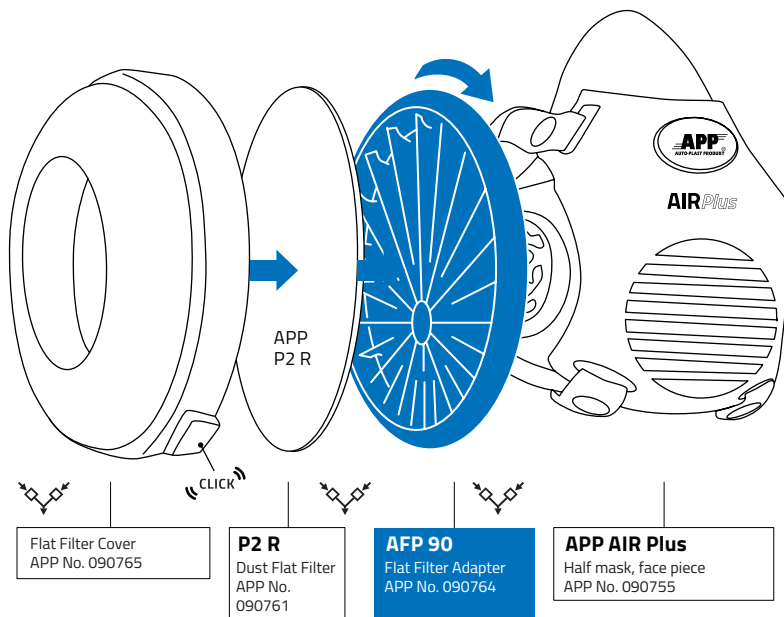

APP AFP 90 Flat Filter Adapter enables to mount the dust flat filter to APP AIR Plus half mask in proper position. Rotate and lock coupling enables quick assembly and disassembly of adapter, as well as smooth replacement of APP AIR Plus P2 R dust flat filters (APP No. 090761).

“Click” type mounted cover of flat filter (APP No. 090765) makes for an additional element fixing the dust flat filter within adapter.

This half mask without activated carbon absorbers makes for a dust half mask, as it protects respiratory tract and prevents inhalation of solids generated during works including sanding performed before coating.

Technical Data	
Fixing	Rotate and lock coupling APP
Diameter	90 mm
Material	Polypropylene (PP)
