NTools PSP - Air-Driven Straight Grinder

DESIGN

1. COMPACT AND ROBUST

Made from strong and high quality materials that offer high performance and resistance to work conditions.

2. COMPACT BODY

Small-size casing and low weight ensure total work comfort, also in case of hard-to-reach surfaces.

3. TROTTLING VALVE

Provides for smooth control of operating speed in range of 0-22000 RPM.

4. SWITCH LOCK

Prevents against an accidental operation and ensures total safety during work.

USE:

- Works related to machining of metal, stone, wood and plastic,
- Grinding, polishing and deburring of sharp edges, welds as well as small and hard-to-reach slots and holes,
- Works related to removal of gaskets and rust,
- Paint and body repairs.
