

• NTools Paint Mixing Machine

NTools Paint Mixing Machine features with robust and modern design and automated operation. This device ensures proper and precise mixing of base-coats and pigments (of APP Modular System) available in APP offer of 3.5 and 4.0L capacity. NTools Paint Mixing Machine is provided with the switch and "TIMER" that allows time set-up from 1 to 15 minutes. Upon expiry of time operation of stirrers will stop automatically. Device offers four "sockets" driven independently by electric motor of 15W power. Rubber feet within the base ensure stability whereas the upper part of construction may be used for storage (max. 4 packages).

USE:

- Mixing of: base-coats, pigments

ADVANTAGES:

- Ensured proper and precise mixing of products;
- Prevents spillage of base coat or pigment as during standard mixing;
- Clean and tight package, product and protection against drying;
- Very quiet;
- Stirrer fitted with a handle that facilitates hand-ling of cans as well as a nozzle that dispenses product precisely;
- "Timer"- allows planning and good work management;
- Small dimensions;
- Compact design, simple and quick installation

Switch

"Timer"
1- 15min

NTools Paint Mixing Machine is fitted with **4 stirrers**.

NTools Paint Mixing Machine	
APP No.:	170350
Dimensions:	Length 85cm / Width 30cm / Height 54cm
Stirrers:	4 items
Voltage:	220-240V 50HZ 10A
Engine power:	15W
Power consumption:	60W
Engine working temperature:	60-70 °C
Power cable length:	280cm
Switch:	ON / OFF
