NTools CE Trolley

Car body elements purposed trolley

Design:

NTools

1 Wrapping - foam
Provided with Polyurethane foam wrapping that prevents risk of damage during storage.

2 Notepad
Magnetic notepad including 20 sheets.

3 Rubberized ropes 80-120 cm
Fastening elements that protect against collapse or damage.

4 4 big rubberized wheels
including two provided with brake. Provided with rubberized tread resistant to wear and absorbing vibration during trolley movement. Big sized wheels facilitate manoeuvres on the top flooring or grating.

5 Internal basket

6 External basket
For storage of small and low weight car body parts; parts may be hanged in different positions.

7 2 hangers / clamps
made from 6 mm wire, to hang conduits, cables, gaskets etc. or to provide support, if necessary.

8 2 big + 2 small containers
For storage of tiny parts placed inside the basket or on the edge of external basket.

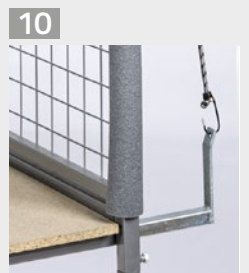

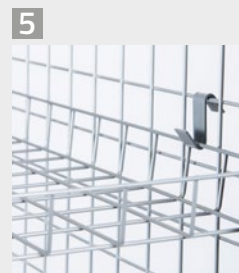

9 2 shelves
including a chipboard 12 mm thick; max load capacity 75 kg each.

10 4 additional beams
For storage of large and heavy car body parts.

11 Plastic plugs
To protect against sharp edges.

The design including galvanized and powder coated steel components.
