

Care Agent Application Sponge

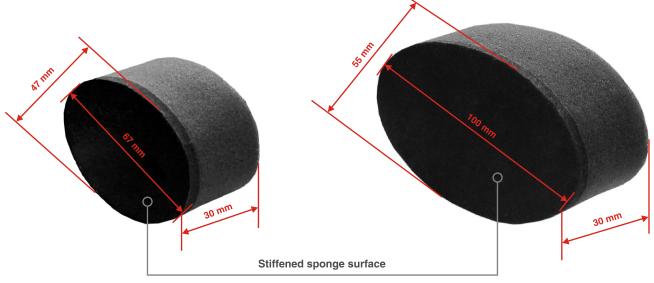

APP No. 220216/220217

Sponges specially designed to enable precise application and distribution of care agents of different density on coated surfaces of plastic, rubber, vinyl and leather etc.

Adaptation to any surface provides for efficient and economic application, as well as saves time and ensures excellent work results.

Features:

- Quick application of thin layers
- Control over thickness of each applied layer
- Rigid handle that ensures work comfort
