

• **APP LB Soft**
Very soft and thick haired for cleaning leather upholstery

The APP LB Soft is a leather upholstery cleaning brush with very soft hairs. It is dedicated for use on the surfaces of smooth and ventilated leather, as well as alcantara, suede or eco leather. The brush with 8 rows of very densely spaced hairs ensures smoothness during cleaning of surfaces, while simultaneously protecting the material against abrasions.

It excellently removes dirt from the pores, seam patterns, stitches, folds and creases on leather upholstery. The brush does not color the surfaces, and its 100% natural horsehair does not react with detergents used for cleaning and maintaining leather. The brush body made out of plastic grants it additional durability.

APP LB Soft has an original, ergonomically profiled shape which perfectly fits into the user's hand. The brush is an essential tool used when performing work focused on a precise service.

Application: for cleaning leather upholstery and vehicle interior elements.

Advantages:

- ergonomic shape,
- does not scratch surfaces,
- very durable,
- resistant to detergents,
- soft, natural horsehair,
- long, thick and very soft hairs.
