• APP PRG 50 Plastic Polyurethane Adhesive

APP PRG 50 is two-component Polyurethane adhesive of black colour indispensable for repairs of plastic, steel, aluminium, wood and glass. It features with short drying time and high stress resistance. The adhesive polymerizes at ambient temperature and is odourless.

Upon hardening may undergo mechanical treatment and be covered with top coats.

APP PRG 50 is dedicated for repairs of bumpers, moulding, mirror housing, headlights, grille and other plastic components.

RECOMMENDED FOR

- Bonding of plastic elements
- Repairs of boats and yachts
- Repairs of sporting equipment
- Repairs of deflectors, spoilers and other car parts
- Repairs of electronic equipment

USE

- 1) Place the cartridge to applicator (APP No. 220623)
- 2) Remove the cartridge cap
- 3) Check, if both components are dosed equally
- 4) Mount the blending tip (APP No. 220622)
- 5) Dull and degrease the surface with APP WK900
- 6) Place thin coats at place of repair
- 7) Spread the adhesive with spatula during 5
- 8) Allow 15 minutes for bonding
